

3D LASER SCANNING LUNCH & LEARN

3D laser scanning technology is increasingly used in engineering and construction projects. Join us for a complimentary lunch and listen to Richard R. J. Johnson, 3D Specialist with Underhill explain and discuss this revolutionary technology and its future in industry.

Topics include:

- Principles and applications of Virtual Design and Construction (VDC)
- Benefits and limitations of 3D Laser Scanning
- What to ask for when requesting a scan (parameters to consider)
- Deliverables options: formats, software 3D viewers and tools

Realtime Laser Scan and Cloud registration will be illustrated during this session

Session details:

DATE: Friday November 22, 2019
TIME: 12:00 - 13:00

LOCATION: Underhill Geomatics Ltd.
Diamond Plaza
#202-5204 50th Avenue
Yellowknife, NT

Please RSVP

TEL: 867.669.2048
EMAIL: yk@underhill.yk.ca
